

Estimated Vehicle Trips

The estimated number of vehicle trips is based upon the following assumptions:

- The facility will be open between the hours of 8 a.m. and 5 p.m.
- The facility will operate Monday through Friday
- A maximum of 7 uses per day
- A maximum of 5 part-time employees would work at the facility.
- The facility will not be open to the public or used for services
- Typical deliveries to the site would range between 2 and 3 per day

The estimated vehicle trips per day would be 34 trips. Actual traffic may be less if the facility is only used between 4 and 5 times per day.

The estimated trips are estimated as follows:

- 14 vehicle trips from funeral homes
- 10 vehicle trips for employees
- 10 misc vehicle trips

The majority of vehicle use would consist of passenger cars or passenger vans. Other vehicle use would include propane delivery and package delivery.

Parking

Parking spaces for 4 vehicles should be sufficient based upon the following assumptions:

- Two employees would be onsite
- One to two other vehicles would be onsite.

Additional parking or standing space should be available for deliveries etc.
