RE: Surplus Equipment Sales

The Wastewater Department recently bid surplus equipment, which included two filter belts presses and one conveyor.

The result of the bid has yielded the city the amount of **\$42,400**.

Council action requested: Authorize the City Manager & Wastewater Superintendent to expend the \$42,400 on the current wastewater project. These expenditures will be based on the previous list on items eliminated from the project due to lack of funds as prioritized by the Wastewater Advisory Committee. The list of items added back into the project will be reported to the council.
