

To: Ordinance Review Committee  
From: Mark Eyerman  
Subject: Discharge Amendments  
Date: June 15, 2022

The following are draft amendments to the proposed revised version of what is now called Title 28 of the Code of Ordinances to add Kris' proposed language dealing with discharges to the part of the code that deals with Sewers and Water. This seems to be the appropriate place since other provisions of Chapter 28 deal with various discharges to the sewer system:

1. Amend the introduction to revised Title 28 to add a new Chapter 28.5 Discharges to read:

## **TITLE 28**

### **CHAPTER**

- 28.1 Gardiner Water District**
- 28.2 PreTreatment**
- 28.3 Sewer Use Charges**
- 28.4 Sewer Use**
- 28.5 Discharges**

2. Amend revised Title 28 to add a new Chapter 28.5 Discharges to read:

### **CHAPTER 28.5**

#### **Discharges**

#### **SECTION**

- 28.5.1 Sump pumps**
- 28.5.2 Stormwater Drainage**

#### **Section 28.5.1 Sump Pumps**

No sump pump, roof gutter, or similar drainage system shall be permitted to discharge directly onto a public right-of-way, or to be terminated so that it discharges onto a public right-of-way. Such drainage may not create pooling or otherwise present a potential hazard or nuisance as determined by the Code Enforcement Officer or a Public Works Employee.

## **Section 28.5.2 Stormwater Drainage**

No drainage system such as a roof drain, perimeter drain, or floor drain that is designed or intended to discharge to any part of the municipal storm water system including into ditches, culverts, basins, etc. may be installed without the prior written permission of the Public Works Director.
