

This certifies that the undersigned Selectmen of the Town of Gardiner have laid out a street, being part of B. Street on Adams' plan of the village lots, in said Town as follows - to wit - Beginning, at the southerly corner of Lot No. 21 fronting on Brunswick Street and belonging to -- McLellan thence on the south line of said lot No. 21 nine rods, thence on the rear line of the lots fronting on Factory Street S. 69W to the west corner of Lot A. H. The above described line to be the northerly line of said Street and the Street to be 3 rods wide as delineated on the plan of the village lots made by Solomon Adams.

Gardiner, April 17, 1837

Ansyl Clark) Selectmen
) of
E. F. Deane) Gardiner

April 17, 1837 The town voted to accept the foregoing Street upon conditions that there be no expense to the town for two years, except the highway taxes on the property on said street.

Page 21

Return of a continuation of B. Street.

The undersigned having examined the ground for a street petitioned for by Benj. Dow and others, report the following courses and distances as the most suitable location for said Street viz: Beginning on the North East corner of lot 3 T and opposite the south east corner of Lot A H, and running south 69 degrees west $7 \frac{6}{10}$ rods to the corner of lots 4 & 5 T, thence running south 52 degrees west about 20 rods to the corner of Lots 9 T and No. 6 on Beech Street, thence wouth 38 degrees west $5 \frac{4}{10}$ rods to the corner of said No. 6 Beech Street. This being the south line of the road and the road to be three rods wide. The undersigned report in favor of the acceptance of the above described street, on condition that no expense shall occur

NOYE'S MINUTES

PAGE 143

Noye's notes and minutes in relation bounds of streets - encroachments upon them or made when surveying and locating the streets in 1859.

"All the monuments marking the City Survey are Granite posts about 8 inches square and marked with the letter M, or iron rods from 3 to 4 feet long set in Granite blocks & buried so as to leave but an inch or two above the surface of the ground in the true angle. And where a ledge occurs the angle is marked by a drilled hole with a letter M near it. In all cases the Granite posts are set entirely in the Streets so that the corner made by its two outer sides is the angle.

Care should be used by the street Commissioner not to mistake any of the numerous stones marking division lines for the boundaries of the street lines.
